

HAMZA ABDULLAHI AHMED

hamzagaal143@gmail.com • +254 716 696 339 | +252 61 3723598 • Kenya | Somalia • English | Somali | Swahili

PROFESSIONAL SUMMARY

Security-focused Software Engineering graduate with a strong foundation in IT infrastructure, network troubleshooting, and secure system design. Experienced in identifying workflow vulnerabilities and implementing digital safeguards in live environments. Completed cybersecurity coursework through GoMyCode (CompTIA Security+) and Open University, with practical exposure to incident analysis, risk mitigation, and threat management. Brings a developer's perspective to security challenges capable of both understanding attack surfaces and building resilient systems from the ground up.

PROFESSIONAL EXPERIENCE

Software Developer | **Hormuud Telecom**
Mogadiscio, Somalia

Apr 2026 –

- Support the maintenance and enhancement of CRM, SIM registration, and call center management systems.
- Manage customer data, SIM card registration records, and service requests to ensure data accuracy and compliance.
- Troubleshoot system issues and provide technical support to improve service availability and user experience.
- Collaborate with operational teams to streamline customer service workflows and optimize system performance.
- Contribute to testing, debugging, and documentation of system features to support business operations.
- Manage and validate organizational data, improving system accuracy and operational efficiency.

IT Technician | **Salaam Air**
Nairobi, Kenya

Aug 2025 – Mar 2026

- Improved data integrity and security of flight, crew, and passenger record systems by identifying vulnerabilities, implementing access controls, and maintaining accurate databases.
- Provided Tier-1 IT support, troubleshooting software, hardware, and network issues for 20+ staff while minimizing operational downtime.
- Strengthened data security and integrity by implementing access controls and improving management of flight, crew, and passenger records
- Automated flight and crew scheduling processes, reducing manual workload, improving efficiency, and minimizing human-error risks.
- Developed and maintained data management scripts and SQL-based database solutions for data validation, retrieval, and reporting.
- Created technical documentation and collaborated with operations teams to optimize workflows through secure digital solutions.

Volunteer, Commercial Department | Barnados Children's Home *Sep 2024 – Nov 2024*
Nairobi, Kenya

- Handled sensitive administrative and logistical data responsibly, maintaining confidentiality and operational continuity.
- Assisted in coordinating events with external stakeholders, demonstrating strong interpersonal and organizational skills.
- Supported day-to-day operations in a team environment, contributing to organizational mission and service delivery.

PROJECTS

Walmart Sales Demand Forecasting System *Python, TensorFlow, Data Analysis*

- Applied data validation and feature engineering techniques to ensure model integrity and prevent data poisoning in a machine learning pipeline.
- Designed system architecture with data accuracy controls and audit-ready outputs to support governance and compliance requirements.
- Demonstrated ability to work with large datasets while maintaining data confidentiality and system reliability.

Freelancing Marketplace Platform (FMP) *React, Node.js, MySQL, REST API*

- Implemented secure user authentication, input validation, and payment processing workflows to protect user data and prevent unauthorized access.
- Designed RESTful API endpoints with access control mechanisms, limiting exposure of sensitive business logic.
- Built the platform with security-first architecture principles, addressing OWASP-relevant risks including SQL injection and XSS attack vectors.
- Designed and developed a full-stack freelance marketplace platform addressing inefficiencies in service discovery, project management, and client–freelancer communication
- Implemented scalable architecture to enhance transparency and user experience.

Inventory & Asset Management System *Next.js, React, TypeScript, Tailwind CSS, Recharts*

- Contributed to the development of a full-stack Inventory & Asset Management System used to manage organizational assets and employee allocations.
- Designed and implemented responsive dashboard interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Integrated multiple frontend modules with backend APIs, enabling efficient asset tracking, reporting, and management workflows.
- Developed interactive data visualizations and reporting features to support operational decision-making.
- Collaborated within an agile team environment using Git and GitHub for version control and project management.
- Developed interactive charts and data visualizations using Recharts to support reporting and analytics.
- Collaborated with backend developers to ensure seamless API integration and consistent data flow across the application.
- Participated in UI testing, debugging, and performance optimization to improve system reliability and responsiveness.

Hospital Management System *React.js, Spring Boot, MySQL*

- Designed and developed a full-stack Hospital Management System to digitize hospital operations and improve healthcare service delivery.
- Implemented secure user authentication and role-based access control for administrators, doctors, nurses, and staff.
- Developed patient registration and electronic medical records management modules for efficient storage and retrieval of patient data.
- Built an automated appointment scheduling system to reduce patient waiting times and improve workflow efficiency.
- Created billing and payment management functionalities to streamline financial operations and reporting.
- Designed and implemented a relational MySQL database with optimized entity relationships for patients, doctors, appointments, and payments.
- Developed responsive and user-friendly interfaces using React.js to enhance user experience across devices.
- Built RESTful APIs using Spring Boot to handle business logic, data processing, and system integration.
- Applied software engineering principles including requirements gathering, system analysis, database design, and testing

TECHNICAL SKILLS

Security: Incident Response, Risk Mitigation, Threat Analysis, Secure System Design
Networking: TCP/IP, Network Troubleshooting, IT Infrastructure, VPN, Firewalls (conceptual)
Operating Systems: Linux, Windows, VirtualBox (VM management)
Programming: Python, JavaScript, Java, React
Frameworks & DBs: Node.js, Express.js, MySQL, MongoDB - web app attack surface awareness
Tools: Git, GitHub, Jupyter Notebook, VS Code

EDUCATION

BSc Software Engineering	2022 – 2026
<i>United States International University -Africa,</i>	
Kenya Certificate of Secondary Education (KCSE)	2018 – 2022
<i>Light Academy School</i>	

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CompTIA Security+ — In Progress (via GoMyCode)

- Actively studying network security, cryptography, identity management, threat intelligence, and compliance frameworks (CIA Triad, NIST).

Learning from Major Cyber Security Incidents

Oct 2025

Open University (OpenLearn)

- Analyzed high-profile breach case studies including ransomware, phishing, and insider threats; applied learnings to incident management, containment strategies, and post-incident review processes.
